
TITLE 326 AIR POLLUTION CONTROL BOARD

**FINDINGS AND DETERMINATION OF THE COMMISSIONER
PURSUANT TO [IC 13-14-9-8](#) AND DRAFT RULE
LSA Document #07-308****DEVELOPMENT OF AMENDMENTS TO RULES CONCERNING ATTAINMENT OR NONATTAINMENT
DESIGNATIONS FOR CRITERIA POLLUTANTS****PURPOSE OF NOTICE**

The Indiana Department of Environmental Management (IDEM) has developed draft rule language for amendments to [326 IAC 1-4](#), Designations, to reformat this rule. IDEM is soliciting written comment on the draft rule language and will schedule a public hearing before the Air Pollution Control Board (board) for consideration of adoption of these rules. This rule will also include the redesignation of Boone, Clark, Elkhart, Floyd, Hamilton, Hancock, Hendricks, Johnson, Lake, LaPorte, Madison, Marion, Morgan, Porter, Shelby, and St. Joseph counties as attainment for the 8-hour ozone National Ambient Air Quality Standard (NAAQS), if U.S. EPA approves the redesignation requests before final adoption of this rule.

CITATIONS AFFECTED: [326 IAC 1-4](#).

AUTHORITY: [IC 13-14-8](#); [IC 13-17-3-4](#); [IC 13-17-3-11](#).

STATUTORY REQUIREMENTS

[IC 13-14-9-8](#) recognizes that under certain circumstances it may be appropriate to reduce the number of public comment periods and public hearings routinely provided. In cases where the commissioner determines that there is no anticipated benefit from a second public comment period, and first public hearing, IDEM may forgo these opportunities for public participation and proceed directly to the public hearing and board meeting at which the draft rule is considered for adoption. Two opportunities for public comment (with this notice, and at the public hearing prior to adoption of the rule) remain under this procedure.

If the commissioner makes the determination of no anticipated benefit required by [IC 13-14-9-8](#), the commissioner shall prepare written findings and publish those findings in the Indiana Register prior to the board meeting at which the draft rule is to be considered for adoption and include them in the board packet prepared for that meeting. This document constitutes the commissioner's written findings pursuant to [IC 13-14-9-8](#).

The statute provides for this shortened rulemaking process if the commissioner determines that:

(1) the rule constitutes:

(A) an adoption or incorporation by reference of a federal law, regulation, or rule that:

(i) is or will be applicable to Indiana; and

(ii) contains no amendments that have a substantive effect on the scope or intended application of the federal law or rule;

(B) a technical amendment with no substantive effect on an existing Indiana rule; or

(C) a substantive amendment to an existing Indiana rule, the primary and intended purpose of which is to clarify the existing rule; and

(2) the rule is of such nature and scope that there is no reasonably anticipated benefit to the environment or the persons referred to in [IC 13-14-9-7\(a\)\(2\)](#) from:

(A) exposing the rule to diverse public comment under [IC 13-14-9-3](#) or [IC 13-14-9-4](#);

(B) affording interested or affected parties the opportunity to be heard under [IC 13-14-9-3](#) or [IC 13-14-9-4](#); and

(C) affording interested or affected parties the opportunity to develop evidence in the record collected under [IC 13-14-9-3](#) and [IC 13-14-9-4](#).

BACKGROUND**Rule Reformatting**

[IC 13-17-14](#) authorizes the board to adopt rules that classify regions into attainment and nonattainment areas for regulated air pollutants based on scientific study of geographical, topographical, and meteorological data and to set standards for ambient air quality for each region to effectuate the purposes of air pollution control laws.

Title 40 Code of Federal Regulations (CFR) Part 81.315 contains the attainment status designations applicable to Indiana as approved or designated by the United States Environmental Protection Agency (U.S. EPA) under Section 107 of the Clean Air Act. The attainment status designations traditionally have been incorporated by reference into Indiana's rules at [326 IAC 1-4-1](#) and amended whenever U.S. EPA approves a redesignation request from nonattainment to attainment.

The purpose of this rulemaking is to reformat [326 IAC 1-4](#), Designations, from its incorporation by reference

form to a full text incorporation in table format, adding new rule sections for each of the 92 counties. Currently, a rulemaking to change an attainment status designation cannot be initiated until U.S. EPA publishes its final approval of a request for redesignation in the Federal Register. The proposed change to the format of the rule will allow IDEM to initiate a rulemaking to reflect the new redesignation status to attainment at the same time that IDEM submits a request for redesignation for a particular criteria pollutant to U.S. EPA. The gap in time between U.S. EPA's approval of a redesignation request and the subsequent incorporation of that approval into [326 IAC 1-4](#) will be greatly decreased, allowing pending air pollution permits to be issued quicker and under less restrictive attainment area standards.

The draft rule is organized by county rather than by pollutant for the following criteria pollutants: sulfur dioxide (SO₂), carbon monoxide (CO), ozone (O₃), particulate matter (PM₁₀), nitrogen dioxides (NO₂), and lead (Pb). PM_{2.5} designations will be added in a separate rulemaking.

Ozone Redesignation

On April 30, 2004, U.S. EPA published nonattainment designations for 24 Indiana counties, entirely or in part, for the 8-hour ozone NAAQS (69 FR 23858). The standard is set at 0.08 parts per million (ppm). Boone, Clark, Elkhart, Floyd, Hamilton, Hancock, Hendricks, Johnson, Lake, LaPorte, Madison, Marion, Morgan, Porter, Shelby, and St. Joseph counties were designated as basic nonattainment for the standard, and Lake County and Porter County were designated as moderate nonattainment for the standard. These designations require Indiana to develop a plan to reduce volatile organic compound (VOC) and oxides of nitrogen (NO_x) emissions and make a demonstration that the areas will meet the 8-hour ozone NAAQS by June 15, 2009.

Ozone monitoring data and photochemical modeling analyses demonstrate that air quality has met the NAAQS for ozone in Boone, Clark, Elkhart, Floyd, Hamilton, Hancock, Hendricks, Johnson, Lake, LaPorte, Madison, Marion, Morgan, Porter, Shelby, and St. Joseph counties in advance of the development of an attainment plan. Air quality in these areas has improved largely as a result of regional NO_x reductions from power plants implemented in 2004. As a result, Indiana has requested U.S. EPA to change the 8-hour ozone designation for Boone, Clark, Elkhart, Floyd, Hamilton, Hancock, Hendricks, Johnson, Lake, LaPorte, Madison, Marion, Morgan, Porter, Shelby, and St. Joseph counties from nonattainment to attainment. Indiana submitted the redesignation requests on May 30, 2006, for both LaPorte County, and the Elkhart County and St. Joseph County areas, on July 10, 2006, for Clark County and Floyd County, on September 12, 2006, for Lake County and Porter County, and on March 26, 2007, for the Central Indiana counties of Boone, Hamilton, Hancock, Hendricks, Johnson, Madison, Marion, Morgan, Shelby. Included with these requests were summaries of relevant air quality data, evidence of the opportunity for public review of the requests, including public hearings, and a discussion of how the various criteria for redesignation have been met.

U.S. EPA is evaluating Indiana's requests for redesignation based on a review of the five prerequisites for redesignation of areas from nonattainment to attainment as identified by Clean Air Act Section 107(d)(3)(E). These criteria are:

1. The area has attained the applicable air quality standards.
2. The area has a fully approved State Implementation Plan (SIP) under Section 110(k) the Clean Air Act.
3. U.S. EPA has determined that the improvement in air quality in the area is due to permanent and enforceable emission reductions.
4. U.S. EPA has determined that the maintenance plan for the area has met all of the requirements of Section 175A of the Clean Air Act.
5. The state has met all requirements applicable to the area under Section 110 and Part D of the Clean Air Act.

In this rulemaking, IDEM is proposing to redesignate to attainment for the 8-hour ozone NAAQS any of these counties for which U.S. EPA has approved the redesignation request before final adoption of this rule. For any counties that are not redesignated by U.S. EPA before final adoption of this rule, IDEM will initiate a separate rulemaking at a future date.

IDEM also proposes to remove [326 IAC 1-4-1\(b\)](#) because it is no longer needed. This provision was added with the 8-hour ozone nonattainment designations to ensure that permit applications that had been submitted to IDEM, but not issued before the 8-hour ozone designations became effective, were issued under the nonattainment rules in accordance with federal requirements. Because all permit applications submitted prior to the 8-hour ozone nonattainment designations have been acted upon, the provision is no longer necessary.

Adoption of the federal redesignations for these counties, if effective prior to final adoption of this rule, will not have a substantive effect on the scope or intended application of the federal rules. IDEM conducted public hearings for Boone, Clark, Elkhart, Floyd, Hamilton, Hancock, Hendricks, Johnson, Lake, LaPorte, Madison, Marion, Morgan, Porter, Shelby, and St. Joseph counties as required by Section 100(a)(2) of the Clean Air Act to ensure proper public participation.

This rulemaking will incorporate into state rules the final federal approval for redesignating Boone, Clark, Elkhart, Floyd, Hamilton, Hancock, Hendricks, Johnson, Lake, LaPorte, Madison, Marion, Morgan, Porter, Shelby, and St. Joseph counties to attainment for the 8-hour ozone NAAQS, for any of these counties that are redesignated to attainment by U.S. EPA prior to final adoption of this rule. Until the state rulemaking is effective,

these counties will be subject to the state's nonattainment rules, including the permitting rules. Rules included in the maintenance plan for these counties continue to apply to the redesignated area.

IC 13-14-9-4 Identification of Restrictions and Requirements Not Imposed Under Federal Law

No element of the draft rule imposes either a restriction or a requirement on persons to whom the draft rule applies that is not imposed under federal law. This draft rule imposes no restrictions or requirements because it is a direct adoption of federal requirements that are applicable to Indiana and contains no amendments that have a substantive effect on the scope or application of the federal rule.

Potential Fiscal Impact

This rulemaking will have no fiscal impact upon the affected entities because there are no substantive amendments, only a reformat of existing rule text and incorporation by reference of redesignation to attainment of specific counties.

Public Participation and Workgroup Information

At this time, no workgroup is planned for the rulemaking. If you feel that a workgroup or other informal discussion on the rule is appropriate, please contact Suzanne Whitmer, Regulatory Development Section, Office of Air Quality at (317) 232-8229 or (800) 451-6027 (in Indiana).

Small Business Assistance Information

IDEM established a compliance and technical assistance (CTAP) program under [IC 13-28-3](#). The program provides assistance to small businesses and information regarding compliance with environmental regulations. In accordance with [IC 13-28-3](#) and [IC 13-28-5](#), there is a small business assistance program ombudsman to provide a point of contact for small businesses affected by environmental regulations. Information on the CTAP program, the monthly CTAP newsletter, and other resources available can be found at:

FINDINGS

The commissioner of IDEM has prepared findings regarding rulemaking on attainment and nonattainment designations for criteria pollutants as required by federal rule. These findings are prepared under [IC 13-14-9-8](#) and are as follows:

- (1) This rule is the direct adoption of federal requirements that are applicable to Indiana, and it contains no amendments that have a substantive effect on the scope or intended application of the federal rule.
- (2) Indiana is required by federal law to adopt area designations as established by the U.S. EPA.
- (3) During the time an area is designated nonattainment, permits for sources located in the nonattainment county are issued under more stringent nonattainment permitting provisions.
- (4) The full text incorporation of designations will shorten the time it takes to amend the designation in Indiana law to match federal law.
- (5) The public will benefit from prompt adoption of this rule, because the attainment designation of an area determines the permitting requirements applicable to sources applying for a permit.
- (6) Indiana must adopt the federal redesignation of Boone, Clark, Elkhart, Floyd, Hamilton, Hancock, Hendricks, Johnson, Lake, LaPorte, Madison, Marion, Morgan, Porter, Shelby, and St. Joseph counties to attainment so that air permits for the applicable emission in these counties can be issued under the prevention of significant deterioration (PSD) program, rather than the emission offset program.
- (7) The public will benefit from prompt adoption of the federal redesignation of Boone, Clark, Elkhart, Floyd, Hamilton, Hancock, Hendricks, Johnson, Lake, LaPorte, Madison, Marion, Morgan, Porter, Shelby, and St. Joseph counties when they are available, because it will provide consistency with the federal rule that redesignated these counties to attainment for the 8-hour ozone NAAQS.

(8) I have determined that under the specific circumstances pertaining to this rule, there would be no benefit to the environment or to persons to be regulated or otherwise affected by this rule from the first and second public comment periods.

(9) The draft rule is hereby incorporated into these findings.

Thomas W. Easterly
Commissioner
Indiana Department of Environmental Management
